

SOCIAL CONTRIBUTION

Contributing to the Advancement of Glycoscience

We have a social responsibility to contribute to the improvement of the health and well-being of humanity through our activities as a pharmaceutical company. We also support the advancement of glycoscience and medicine by sharing our latest research findings and supporting outside research.

Research support includes distribution of the latest academic information about glycoscience through the online "Glycoforum," which we established in 1997. This nonprofit academic site introduces rapidly evolving information on glycoscience developments by publishing original papers and commentary by key researchers in the field. Glycoforum has attracted the interest of researchers throughout the world, receiving 969,000 visitors in 2006 and being selected as a recommended site by *Nature Reviews*. We

hope Glycoforum will continue to serve as a useful access point for glycoscience researchers.

The Mizutani Foundation for Glycoscience

The Mizutani Foundation for Glycoscience was endowed by Masakane Mizutani, founder and Honorary Chairman of Seikagaku Corporation. The foundation promotes original glycoscience research in Japan and overseas through an active grant program, supports international exchange and hosts glycoscience conferences and makes other efforts to advance glycoscience. Seikagaku strongly supports the foundation in all its efforts.

ORGANIZATION (As of October 1, 2007)

LABORATORIES AND PLANTS

CENTRAL RESEARCH LABORATORIES

The hub of Seikagaku's drug development activities is the Central Research Laboratories. With advanced equipment and a quality work environment, the facility is managed under policies designed to maximize researcher creativity and foster a self-help culture.

TAKAHAGI PLANT

The Takahagi Plant is Seikagaku's production facility for ARTZ[®], ARTZ Dispo[®], OPEGAN[®] and OPEGAN Hi[®]. A fourth production building is under construction.

KURIHAMA PLANT

Products manufactured at the Kurihama Plant include pharmaceutical bulk, such as hyaluronic acid and chondroitin sulfate.

GROUP COMPANIES

SEIKAGAKU BIOBUSINESS CORPORATION

As an independent, wholly owned company spinning off from Seikagaku Corporation in October 2007, it will manage and run fine chemical business operations. Its activities are to include sales of bulk products such as hyaluronic acid and chondroitin sulfate for pharmaceuticals and cosmetics and production and sales of research biologics and diagnostics, such as carbohydrate-related reagents, and endotoxin-detecting reagents.

ASSOCIATES OF CAPE COD, INC.

Based in Falmouth, Massachusetts, Associates of Cape Cod, Inc. (ACC) is a leading global supplier of analyte detection products, including Limulus Amebocyte Lysate (LAL) used for the detection and quantification of bacterial endotoxins.
